The frame is made of folded plate steel, welded and finished with a Cement Grey powder coating (RAL 7033). The seat and backrest are made of (PAG) brown coloured wood and are mounted with hucknails.

PEARL GOLD / BROWN

The frame is made of folded plate steel, welded and finished with a Pearl Gold powder coating (RAL 1036). The seat and backrest are made of (PAG) brown coloured wood and are mounted with hucknails.

BEIGE RED / BROWN

The frame is made of folded plate steel, welded and finished with a Beige Red powder coating (RAL 3012). The seat and backrest are made of (PAG) brown coloured wood and are mounted with hucknails.

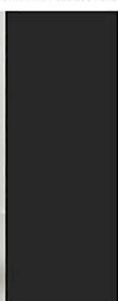

LOAM BROWN / GREY

The frame is made of folded plate steel, welded and finished with a loam brown powder coating (RAL 8003). The seat and backrest are made of (PAG) grey coloured wood and are mounted with hucknails.

BROWN OCHRE / EBONY

The frame is made of folded plate steel, welded and finished with a brown ochre powder coating (RAL 8001). The seat and backrest are made of (PAG) ebony coloured wood and are mounted with hucknails.

BLACK

The frame is made of folded plate steel, welded and finished off with a black powder coating. The seat and backrest are made of (PAG) black coloured wood and are mounted with recessed sediments and a socket-head screw.

WHITE

The frame is made of folded plate steel, welded and finished with a white powder coating. The seat and backrest are made of (PAG) white coloured wood and are mounted with recessed sediments and a socket-head screw.

DETAILS

Dutch industrial design at its best. The chair was designed in the late 50s, early 60s, and produced by Galvanitas in Oosterhout, Netherlands. They chose a design with the so typical passer legs. Instead of the conventional tubular structure, the designer chose a frame made of folded plate steel. The S16 is ideal for use in bar or restaurant, but certainly also an eyecatcher in a residential interior.

DIMENSIONS

Seat depth : 16.5"
